Education

Institute of Engineering & Management, Kolkata — West Bengal, India
Bachelor of Technology in Computer Science and Engineering, CGPA: 8.72 — *Jun 2023 – Jun 2027*

Experience

Summer Intern — May 2026 – July 2026
eRevMax – RateTiger Hotel Channel Manager — *Kolkata, India*

- Owned backend development of an existing **Customer Portal prototype**, translating requirements into REST APIs using **Spring Boot, Spring Security, and MySQL**.
- Implemented **JWT authentication, OAuth2, RBAC, and refresh-token rotation**, separating authentication from authorization to secure customer resources and manage token lifecycles.
- Collaborated with a frontend teammate to integrate backend services with **React-based dashboards and landing pages**, guiding implementation and coordinating frontend-backend development.

Projects

Drop Background – AI-Powered Background Remover | *Java, Spring Boot, React* — Nov 2025 – Jan 2026

- Code Link – GitHub | Video –Live Demo
- Architected a full-stack AI background removal workflow, integrating **ClipDrop API via Spring Cloud OpenFeign** to abstract third-party communication from business logic and streamline image processing.
- Integrated **Clerk authentication with Spring Security**, using JWT validation to establish secure communication between the React frontend and Spring Boot backend while retaining backend control over protected resources.
- Integrated **Razorpay payment APIs** with backend credit management, connecting payment operations with credit purchases and automating the application's credit management workflow.

Full-Stack Authentication System | *Spring Boot, Spring Security, React.js & MySQL* — May 2026 – Sep 2026

- Code Link – GitHub
- Designed a full-stack authentication system implementing end-to-end authentication and authorization using **Spring Security** and React.
- Implemented **JWT authentication with refresh tokens and HttpOnly cookies** to manage token validation, session renewal, and access to protected resources.
- Integrated **OAuth2 login** alongside credential-based authentication and implemented user management workflows using Spring Data JPA and Hibernate.

Technical Skills

Languages: Java, C (Basic)
CS Fundamentals: OOPs, DSA, Operating Systems, DBMS, Computer Networks
Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Material UI
Backend: Spring Framework, Spring Boot, Spring Data JPA, Spring Security, Spring AOP, REST APIs, JDBC, Hibernate, JWT, OAuth2
Developer Tools: Git, VS Code, IntelliJ, Eclipse, Docker, Linux (Command Line Basics)
Database: MySQL, PostgreSQL

Achievements & Certificates

- **Real Venture Certified** – Wadhwani Foundation | Certificate Link – Certificate
- Solved **500+ Data Structures & Algorithms** problems on LeetCode.
- **Programming in Java** – NPTEL (IIT Kharagpur) | Certificate Link – Certificate
- **Computer Networks and Internet Protocol** – NPTEL (IIT Kharagpur) | Certificate Link – Certificate

Coding Profiles

- LeetCode | takeUForward | GeeksforGeeks
